OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50
U. S. C. 31 AND 32 AS AMENDED. ITS TRANSMISSION OR THE REVELATION
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

* Documentary

SOURCE

25X1

The attached tabulation of railroad water supply stations in the Russian Zone of Germany, status of 1 November 1951, which was obtained from the Directorate General, Railroads, Berlin, is forwarded to you for retention.*

25X1

* ☐ Comment. The tabulation lists all the water supply points of the Russian Zone railroads, according to the eight railroad districts. The tabulation also contains information on the location of the water supply station (columns 2 and 3), source of water (column 4), handling capacity of water station expressed in cubic meters within a 24-hour period (column 5), degree of hardness of the water (column 6), pumping installations with data on their capacity and manometric head (columns 7 through 9), driving machinery for pumps with data on types and capacity (columns 10 through 12), available water tanks (columns 13 through 16), available water filling pipes (columns 17 and 18), and the average daily consumption of water at each water supply station.
